

This course is presented by **John Rensink**, owner of Superb Audio Visual

Systems. John is driven by a passion for helping people present their mes-

sages through influ-
ential live events. He has experience as a teacher, speaker, musician, designer, and technician, and has performed these roles in thousands of live events.

John holds a B.A.S. in Mathematics Teaching and an audio systems certification from the National Institute for Certification in Engineering Technologies. He currently has over 3,000 classroom teaching hours, and has implemented a full teaching curriculum as an licensed audio/visual contractor.

John is also an accomplished and educated musician. He has performed in bands for over twenty years as a drummer, and has multiple recording credits to his name.

The Complete Church Sound Technician:

A Comprehensive Audio Course for Worship Teams, Audio Technicians, Pastors, and Musicians

Course Overview:

The Complete Church Sound Technician was created to help church sound crews deliver impactful and meaningful worship services.

We interviewed churches of all sizes, and designed the course modules to correct the predominant troubles that church audio teams face today.

- Feedback, hiss, buzz, and static
- Loud, imbalanced, and unnatural sounding voices and musical mixes
- Musicians that cannot hear themselves
- Missed cues
- Bad recordings
- Disagreements and hurt feelings surrounding what the system can and cannot do

These troubles will be fixed throughout a day filled with student participation, 24 track audio mixing examples, and student projects that will impact the way your service is delivered.

Course Modules:

Students will actively learn the following core competencies through engaging, hands-on activities:

1. The ABC's of Live Sound Reinforcement
2. Capturing Pristine Audio Sources with Great Microphone Technique
3. System Cabling and Care
4. Audio Mixing Consoles 101 (Analog and Digital)
5. Prepare, Run, and Analyze a Worship Service
6. Make Your Recordings Studio-Quality
7. Signal Processing—A Craftsman's Tools
8. Troubleshooting and Maintenance
9. Create and Sustain the Best Sound Crew

Results:

Here are three benefits from attending The Complete Church Sound Technician :

- Your worship team will perform their best with improved audio delivery
- Your audio crew will deliver great mixes that are free of the predominant audio troubles—*it will be easier for them*
- Your congregation will worship free of distractions, enhancing their spiritual experience at your church

Both new volunteers and seasoned veterans will benefit from taking this all-encompassing course. Sending your entire worship team will:

- Generate new ideas and enthusiasm for your worship services
- Foster unity throughout the team, and
- Save you money in registration fees
