

## About SAVS

Superb Audio Visual Systems is a Minneapolis, MN based company that designs and implements live event communication systems. Our focus is to provide exceptional systems for all of our clients, so their focus stays on their events.

### *Our Mission:*

To perfect the system of event communication for all of our clients.

As a licensed, insured, and certified Minnesota contractor, Superb Audio Visual Systems can help you determine the health of your audio visual system. We can tell you what parts of your system are in good condition and their life expectancies.

*Now is the time to assess the health of your audio visual system. The contents of this brochure can get you started.*

PO Box 20493  
Minneapolis, MN 55420

**N**o matter whether you are a principal addressing your school, a pastor delivering your sermon, a best man toasting the new bride and groom, or a presidential candidate rallying for votes, your message is of utmost importance.

As the primary vehicle that carries your message, your audio visual system should be in great health.

Superb Audio Visual Systems can help you determine the health of your system.

*The following symptoms are exhibited by systems in need of a checkup. Read through and check them against your system's performance:*

## **Symptoms Your System May Exhibit When in Need of a Checkup**

### **YOUR PROGRAM**

- Event participants, AV crew, and stage management miss cues.
- Additions or changes to your program have pushed your AV system past its maximum output.

### **YOUR AUDIO-VISUAL CREW**

- The technical “glue” that holds your events together is missing.
- Voices and music tend to sound unnatural.
- Formal training has not been administered.

### **YOUR VENUE**

- One seat in the house sounds or looks vastly different from the rest.
- Sounds tend to echo or flutter.
- Certain light sources drown out your displays.

### **YOUR AUDIO-VISUAL SYSTEM**

- Red lights flash more than occasionally.
- Noise, radio stations, distortion, or feedback occurs.
- Video displays lack the sharpness they used to have, or display incorrectly.
